

# ScanCheck Pro

By KCWare Technologies

Perfect for banks, credit unions, RCK businesses and other companies looking to develop web-based or remote deposit solutions, Scan Check Pro supports special documents like postal money orders, Western Union® and MoneyGram®. It's compatible with Digital Check's CheXpress™, one of the leading scanners on the market; and its fast and easy imaging functions provide some of the highest quality images on the market.

And Scan Check Pro's straightforward functionality makes coding a breeze. Its image window with TIFF and JPEG outputs can display both front and back of checks as they are scanned. Since no software development kit (SDK) or peripheral programs are needed to run Scan Check Pro, this cutting-edge app is a cost-effective and efficient alternative to traditional check-scanning applications.
